THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

DETAILED ACTION

Allowable Subject Matter

1. Claims 1-32 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art neither anticipates nor renders obvious the precise combination of limitations recited in independent claims 1 and 18, said limitations specifically calling for: i) a value document substrate comprising at least two different feature substances, said feature substances forming mutually independent codings, the first feature substance being applied to the surface of the value document and the second feature substance being applied to the surface of the value document or incorporated into the volume of said substrate, said feature substances comprising luminescent substances having a complex spectral distribution, said complex spectral distribution itself forming a coding (claim 1); and ii) a method for producing a value document including at least two feature substances which form mutually independent codings, the first feature substance being applied to the surface of the value document and/or incorporated into the volume of the value document and the second feature substance being either applied to the surface of the value document, said feature substances comprising luminescent substances having a complex spectral distribution, said complex spectral distribution forming a coding itself (claim 18). The prior art cannot be reasonably combined in such a manner as to meet the requirements set forth in the aforementioned limitations of Applicants' remaining dependent limitations absent the use of improper hindsight.

Art Unit: 3725

3. The closest prior art is U.S. Patent No. 6,506,476 to Kaule et al. ("Kaule"), which generally describes a value document having a luminescent substance particles dispersed throughout the core of the substrate. One might argue that Kaule implicitly discloses Applicants' general invention, given that both Kaule and Applicants' claimed invention are directed to security documents having spectral substances associated therewith.

4. However, Kaule fails to specifically disclose the formation of a coding by the spectral distribution of the luminescent particles itself.

5. Examiner is aware of U.S. Patent No. 5,259,907 to Soules et al. ("Soules"). Soules teaches the concept of providing a hidden coding on the surface of a substrate, but no motivation is found to modify Kaule to obtain the claimed invention of claims 1 and 18 because as opposed to Kaule, which has particles dispersed throughout the volume of the substrate, Soules features codings formed by markings made upon the surface of the substrate. Furthermore, to modify the primary reference to obtain the claimed invention would destroy the workability of said primary reference, as the addition of the Soules coding features to the Kaule substrate would cause a clash between the Kaule embedded luminescent substance and the Soules codings, resulting in the inoperability of both. Examiner is also aware of U.S. Patent No. 4,455,039 to Weitzen et al., teaching a similar concept of providing a hidden coding on the surface of a substrate, but the combination of said reference with the Kaule and Soules teachings would yield a similarly problematic result. Furthermore, none of the references contemplate the provision of at least two different feature substances upon the same

Art Unit: 3725

value document, wherein the first and second feature substances form mutually independent codings. Rather, Kaule, Soules and Weitzen each teach the provision of a single coding.

6. With regard to the remaining limitations that Kaule fails to specifically disclose, the prior art fails to teach said remaining limitations, along with proper teaching, suggestion or motivation for making the requisite combinations without the use of improper hindsight. Furthermore, the number of additional references and the manner in which said references would be required to be modified would be strongly indicative of the use of improper hindsight.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
